

Reflective

What went well

- Organizing tasks with timeline
- Customer was satisfied with the showcase
- Customer was satisfied with technical choices
- Pair programming
- Unit tests – 80% coverage
- Documentation

What went wrong

- Communication between team pairs
- Communication with client over features are most important
- Lack of technical support from client
- Client not part of backlog meetings

Action plan moving forwards

- Ensure at least one stand-up per working day
- Pursue the client for details/priorities
- Do handover documentation
